

John Grand
Software Engineer/WebMethods Applications Lead/Developer

218.760.4423 / johnathan.grand@gmail.com

Experience Summary:

- Over 25 years of professional IT Experience in **Consulting, Analysis, Design, Development and Implementation** of software applications that focuses primarily on **EAI BPM & B2B Integrations**.
- Hands on experience in building **B2B** and **EAI** applications using **webMethods Product suite** that includes **Integration Server, Trading Networks, Modeler, Designer, webMethods Developer, Broker, UM, Adapters, and MWS**.
- Extensive experience with webMethods v 6.5 through v 10.15 components such as Integration Server, Developer, Designer, Trading Networks, Monitor, Broker, Modeler/Designer, My webMethods Server and Deployer.
- Experience in writing complex Flow and Java Services using webMethods developer.
- Comprehensive knowledge of software development life cycle and its phases. In depth knowledge of **Service Oriented Architecture SOA**.
- Excellent understanding and working knowledge of various file formats like **FlatFile, XML** and **EDI** that includes various standards like **ANSI X12, EDIFACT, ISO PAIN**, etc.
- Experience in installing and configuring **EDI** Module and **wmEDIINT** Modules/documents.
- Experience in configuring adapters like **JDBC, JMS Adapter, Flat file, SWIFT** and **IBM MQ**.
- Knowledge and expertise in the Business process modeling (**BPM**) and Business activity monitoring (**BAM**) space.
- Experience in developing **WSDL/Web Services** using **SOAP RPC** and **SOAP message**.
- Experience implementing solutions using **SMTP, FTP** and **HTTP/s** protocols.
- Experience in **SQL Server** versions 2000 to 2019.
- Experience in **Troubleshooting** and **diagnosing** operational and performance issues.
- **Excellent Communication Skills**, Interpersonal skills and Documentation skills.
- Excellent team player and ability to work independently.
- Quick learner when it comes to new applications and technologies

Education and Certification:

- Bachelors Degree in Business Administration with Emphasis in MIS from Carlson School of Management University of Minnesota (1997)
- Microsoft Certified: A900 Azure Fundamentals (2023).

Technical Skills:

- **EAI/B2B:** webMethods Integration Server 6.5 through 10.15, Trading Networks, webMethods Developer, Broker, webMethods Designer, JDBC Adapter , My webMethods Server, webMethods EDI Modules, webMethods EDIINT , SWIFT Adapter , JDBC Adapter, IBM MQ Adapter and webMethods JMS Provider.
- **Programming Languages:** Java, SQL, XML, SQL, and HTML.
- **Relational Database Management System:** SQL Server, Oracle, DB2.
- **Internet Technologies:** DSP, JSP XML, HTML
- **Operating Systems:** Windows, LINUX, UNIX
- **Design Tools:** Visio and webMethods Designer.
- **Miscellaneous Tools:** MS Office suite, MS Visio, Adobe Acrobat, TOAD for SQL server, TOAD, SQL server management Studio, Win SCP, XML Spy.

Career Overview:

USBank National Association
WebMethods Application Developer

01/01/2009 – 05/06/2025

Responsibilities:

- Responsible for design, development and implementation of Enterprise Application Integration (EAI) solutions using webMethods software products, including, Integration Server, Trading Networks, Designer, and Deployer.
- Analyze, design, develop, and support file translation processes in support of company Payments and Receivables, EDI, flat file and XML translation services.
- Development lead charged with design reviews, code reviews and overseeing team developer's deliverables and test plans.
- SME for webMethods development as well as business processes for all Data Integration processes for team.
- Liasson for new product ideas. Worked with all teams (business line, prod support, BOAs) to bring ideas to projects acting as webMethods.
- SME for production support backing up level 2 om call. Early years participated in 24/7 on call production support.
- Lead webMethods product suite version upgrades. Version 10.7 saw change from Windows Servers to Linux Servers as the backend operating system.
- Configure JDBC adapter to interact with SQL Server and Oracle databases. Create JDBC Notifications and Adapter Services to insert/delete/modify the data from Databases.
- Create reusable Flat File dictionaries/Schemas to support payment translations.

- Work with application analysts to gather and document integration and mapping requirements, relate them to webMethods capabilities and conceptualize end to end integration solutions.
- Maintain the webMethods environment and apply corrective maintenance, including investigation, fault finding, and reporting.
- Responsible for webMethods package deployment using webMethods Deployer as well as through Manual process in Test, Stage, and Production environments.
- Created SQL DB schemas. Handling business critical, urgent, and normal issues related to webMethods integrations.
- Development of technical specifications, building of adapters, mapping, configuration, debugging, testing and documenting all integration programs to support the successful handoff to an application development support organization upon project completion.

Environment: Integration Server/Developer/Designer 6.5 through 10.15, TradingNetworks 6.5 through 10.15, webMethods Broker, JDBC Adapter 6.5/7.1.2, IBM MQ Adapter, JMS, Windows Server, Linux.

Software AG.

04/01/2006 –12/31/2008

Senior webMethods Consultant

Responsibilities:

- Responsible for design ,development and implementation of Enterprise Application Integration (EAI) solutions using web Methods software products, including, Integration Server, Trading Networks, Designer, and Deployer.
- Analyze, design, develop, and support file translation processes in support of company EDI, flat file and XML translation services.
- Configure JDBC adapter to interact with back office Databases.
- Create JDBC Notifications and Adapter Services to insert/delete/modify the data from Databases
- Experience with Enterprise Application Integration including Publish and Subscribe, adapter configuration and development, mapping and transformation rules, Hub and spoke architecture experience; leveraging knowledge of **B2B** software development lifecycle, including trading partner configuration, partner agreements, and EDI mapping rules.
- Service Oriented Architecture (**SOA**) experience, including SOA Service definition, implementation, and SOA governance using webMethods Central Site.
- Business Process Management (**BPM**) experience; using webMethods product suite versions 6.5 to 8.2 including Integration Server, Developer, MWS, Broker, JMS, Trading Networks, Designer, and Modeler.
- Support various webMethods integrations by providing resolutions for defects identified during testing in different environments.
- Responsible for Code movement from Development to Test and Test to Production server.
- Provided **24/7 support for maintenance** systems and Prod Support and stabilized the application post Go Live.
- Performed administrative related tasks such as scheduling tasks, configuring database, JDBC adapter connections.

Environment: Integration Server/Developer 6.5/7.1.2 TradingNetworks 6.5/7.1.2, JDBC Adapter 6.5/7.1.2,Modeler 6.5, wM WebSphere MQ Adapter 6.0, wM DB, MQSeries 5.1, Windows Server.
